

Amateur Radio is not just a hobby. It is a vital communications tool that has proven through history to save lives, promote international goodwill and increase our own national communications abilities.

When a disaster hits and normal utilities go dead, the Ham Radio Operators, using their low power radios, batteries and wire antennas, will still be able to communicate to the rest of the country and the world.

It would be a real shame if their distress calls were not heard.

Please do NOT approve BPL.

The potential interference may directly affect emergency communications.
